Software:

Adobe Creative Suite,
Mac OSX, Windows,
Linux, Subversion, Git

Technologies:

Ruby on Rails, PHP,
XHTML, XML, CSS,
Javascript, MySQL,
HAML, SASS

Objective

I am pursuing a web development position which will allow me to work closely with a team of skilled designers and developers to create forward-thinking and user-focused web applications and websites.

Education

Purdue University, West Lafayette, IN **2000 - 2006**
Bachelor of Science in Computer Graphics Technology

Work Experience

Assembla, LLC **May 2008 - Dec 2009**
Ruby on Rails Web Developer, Technical Lead

I worked with a distributed team on Assembla's proprietary project management software. I worked to improve the user interface and workflow for several key features, including their ticketing system. I worked closely with the president of the company to design and implement a new approach to the site's marketing pages which have led to increased revenue. Additionally, I acted as a technical lead managing a distributed team to oversee completion of several outside consulting projects. www.assembla.com

WeHaventTheTime, LLC **Jan 2007 - Current**
Founder, President

Initially founded with two other designers, I have since taken over as the sole member of the freelance design company. My tasks include securing new work, managing client relations, managing multiple projects at a time from the point of inception through completion, working with clients to design websites, logos and identities that match their vision, and providing clean, concise and efficient web programming solutions. www.wehaventthetime.com

openBook Technologies **May 2006 - Dec 2006**
Lead PHP Developer

I was responsible for the continued development of their proprietary content management system, HydraCMS. I was hired to act as the company's sole authority on the software - training and handling customer requests, fixing bugs and developing new plugins which included blog, photo gallery and calendar modules.
